DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 – 37, drawn to a device for sensing and characterizing particles, and would be classified in 324/71.4.
 - II. Claim 38, drawn to a method for fabricating a microchip, and would be classified in 438/25.

2. Inventions of Group I and Group II are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case Group I claims a device and method for sensing and characterizing particles, while Group II claims the method for fabricating a microchip that could be used with any one of a plurality of different methods for characterizing the measurements obtained by the microchip Coulter counter.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
